**New Altronix eBridge™ 16-Port Ethernet over Coax PoE Switch
Accommodates Fiber for More Versatile Enterprise System Solutions**

eBridge1600F Includes Both Ethernet and Fiber (SFP) Uplinks

eBridge1600F

Las Vegas, NV (September 25, 2018) – [Altronix](http://Altronix.com), the recognized leader in power and transmission solutions for the professional security industry, is showcasing the new eBridge1600F 16-port EoC receiver with integral PoE switch here at GSX 2018 (booth #1950). The new and innovative eBridge1600F power and transmission solution further bridges the infrastructure gap by integrating coax, Ethernet and fiber along with PoE eliminating the cost and labor associated with installing new network cabling.

“Altronix continues to design and deliver new power and transmission solutions that merge infrastructure with emerging technologies to accommodate greater capacity and speed for today’s advanced IP installations,” said JR Andrews, National Sales Executive, Altronix Corporation. “The new eBridge1600F allows coax users to cost-

efficiently upgrade analog systems to IP with the ability to take advantage of new or existing fiber infrastructure to deploy IP devices at greater distances.”

Altronix eBridge1600F is an all-in-one, head-end solution for upgrading coax to IP that combines a PoE+ switch and EoC Receiver into a single integrated unit. It features 16 Ethernet ports rated at 100Mbps (full duplex up to 300m without repeaters) with 30W full power per port (500W total power), one 1Gb SFP (fiber port), and two 1Gb Ethernet uplinks. Additional features include a built-in battery charger, and embedded LINQ™ Technology to monitor, control and report power/diagnostics from anywhere over the network connection.

As with all Altronix products, eBridge1600F is manufactured in the U.S.A., and is backed by a lifetime warranty.

About Altronix

Altronix Corporation is the leading designer and manufacturer of quality low voltage electronics for the video surveillance, security, fire, access control and automation markets. The company continues to enhance its series of products that deliver “More than just power” including LINQ™ Network Communication Technology, Trove™ Access and Power Integration, Pace™ UTP/Ethernet Long Range Ethernet Adapters, eBridge™ Ethernet over Coax Adapters, eFlow™ Power Supply/Chargers, NetWay™ PoE Solutions, NetWay Spectrum Fiber Solutions, HubWay™ UTP Video Solutions, VertiLine™ Rack Mount Power Solutions, ReServ™ UPS Series for video surveillance, WayPoint™ Outdoor Power Supplies, and Strikelt™ Panic Device Power and Control. Altronix’s U.S. corporate headquarters located in Brooklyn, NY occupies over 150,000 square feet, with the latest manufacturing technologies for the highest levels of quality and performance. Altronix is an ISO 9001 registered firm. Altronix products are manufactured in the U.S.A. and carry a lifetime warranty.
