**Altronix Demonstrates Next-Generation Power & Solutions
at The Security Event 2025**

Birmingham, UK (April 8, 2025) – [Altronix](https://www.altronix.com), a recognized global leader in power and data transmission for the professional security industry, is showcasing its latest innovations at [stand 5/K30](#) during The Security Event 2025 in Birmingham, UK. The company's expanding portfolio of products continues to deliver greater versatility and efficiency for systems integrators and end users — streamlining installations, reducing costs, and enhancing system reliability.

"The Security Event provides the perfect platform to demonstrate how Altronix manufactures innovative solutions to address today's security challenges," said Ronnie Pennington, Director of Sales for the Americas at Altronix. "We're focused on showcasing new technologies that not only strengthen and protect critical infrastructure,

but also deliver measurable ROI through reduced installation costs and enhanced system reliability."

Visit [stand 5/K30](#) to experience hands-on demonstrations of Altronix innovative solutions across four key technology categories:

Featured Altronix products at The Security Event include:

NetWay Spectrum with EBC48 Integration

Ruggedized outdoor PoE switches delivering up to 90W per port, now with the **EBC48** battery charger that recharges 32AH batteries in under eight hours—ideal for remote deployments with intermittent power. New 277VAC input options now available, supporting mission-critical devices over fiber infrastructure.

eBridge™ Ethernet over Coax Solutions

Deploy IP devices utilizing existing coax infrastructure up to 300m, while saving time and labor without the need to rip and replace the legacy cabling.

Pace™ Long-Range Ethernet Solutions

Extend Ethernet connectivity up to 1000 meters over a single pair or 500 meters over structured cabling—enabling IP devices in remote or industrial locations where standard Ethernet falls short. Pace also supports T1L industrial devices like sensors and controllers.

Circ™ Redundant Power Solutions

Circ1ATS supports seamless transition between two independent 115VAC or 230VAC inputs, ensuring uptime during power outages and failures to maintain critical security operations.

Trove™ Access and Power Integration Solutions

Pre-wired and pre-configured kits support over 50 leading access control brands including AMAG, AXIS, Brivo, Mercury, Software House, and TDSi. Solutions are

available in scalable wall or rack-mount configurations, simplifying installation and maintenance with a single point of service.

Tempo724Q Programmable Timer

This new dual-channel 24/7 network timer is ideal for applications including access control, lighting, automation, and more. Features include dual form “C” relay contacts, advanced LINQ™ technology for remote diagnostics and scheduling, and reliable synchronization across systems.

LINQ™ Network Power Management

Sophisticated remote monitoring platform enabling real-time control and diagnostics for Altronix devices—maximizing uptime, enabling preventative maintenance, and optimizing overall performance.

Altronix representatives will also be available to discuss the company’s Lifetime Warranty and how their USA-manufactured solutions offer long-term value and performance.

Visit stand 5/K30 during The Security Event to experience these solutions firsthand. For more information, visit www.altronix.com.

About Altronix

Altronix Corporation is the leading designer and manufacturer of quality low voltage electronics for video surveillance, security, fire, access control and automation applications that deliver “More than just power”. Altronix corporate headquarters is located in Brooklyn, NY, U.S.A. occupying approximately 200,000 square feet with the latest manufacturing technologies providing the highest levels of quality and reliability. Altronix is an ISO 9001 registered firm. Altronix products are NDAA and TAA compliant and carry a lifetime warranty.
