Altronix Highlights New Power and Enhanced Networking Solutions at The Security Event Asia 2025

Singapore (11 November 2025) – [Altronix](#), a global leader in power and networking solutions, is showcasing its latest innovations that elevate security and system performance at The Security Event Asia stand 1919. Making its global debut is the new eFlow Pro Series auto-ranging power supply/charger with enhanced features providing greater versatility for myriad access control and security applications. Altronix will also showcase new Access & Power integration products, Networking solutions for single pair ethernet, Fiber, and PoE as well as LINQ™ network power management upgrades.

“Altronix continues to innovate, to meet the growing demand for smarter, more reliable power products that secure and protect critical infrastructure globally,” said Alan Forman, President of Altronix. “Our latest solutions provide the flexibility, intelligence, and performance needed for today’s connected environments.”

Featured solutions on display from Altronix include:

Trove™ Access & Power Integration Solutions

Trove combines Altronix power and accessories with leading access control brands in scalable wall or rack-mount configurations, for an all-in-one solution.

Supporting over 50 manufacturers including AMAG, AXIS, Brivo, Gallagher, and all Mercury platform brands, Trove is available in pre-wired and pre-configured kits that simplify installation, streamline wire management, and provide a single point of service and maintenance.

eFlow™ Pro Series Auto-Ranging Power Supply/Chargers

The new eFlow15UB features auto-ranging 90VAC to 256VAC input with selectable 12VDC or 24VDC outputs, providing flexibility for a wide range of applications. Key features include removable AC input terminals, lithium or SLA battery charging, fire alarm disconnect, and short circuit protection. Optional LINQ™ technology enables remote monitoring, power management, and diagnostics.

NetWay Spectrum Hardened PoE Switches with EBC48 Rapid Battery Charger

NetWay Spectrum delivers up to 90W per port and integrates fiber and power for remote or edge deployments. The EBC48 rapid battery charger restores 32AH batteries in under eight hours to maintain operation when power is interrupted. New 277VAC input options support industrial and outdoor installations.

Pace™ Long-Range Ethernet Solutions

Pace extends Ethernet connectivity up to 1000m over a single pair or up to 500m over structured cabling. It supports T1L industrial devices such as sensors and controllers, enabling cost-effective network expansion using existing infrastructure.

Circ™ Redundant Power Solutions

Circ1ATSE provides seamless transfer between two independent 115VAC or 230VAC inputs to maintain continuous operation in the event of a power failure, ensuring uptime for mission-critical systems.

LINQ™ Network Communication Integration

LINQ network communication integrates with Milestone XProtect VMS, allowing

users to view device and power status directly within the XProtect Smart Client. The integration provides visibility of connectivity, voltage thresholds, service alerts, and battery status to improve overall system management.

Altronix products are backed by a lifetime warranty and our industry-leading technical support team.
