Altronix Highlights Advancements in Power and Connectivity at ISC East 2026

Explore new solutions that maximize uptime, simplify security deployments and extend IP connectivity at booth 809

New York, NY (November 4, 2026) – Altronix, the recognized leader in power and data transmission products for the professional security industry, is showcasing its

advanced power, networking and infrastructure solutions at ISC East 2026 booth 809 that streamline access control, surveillance, fire and other security applications.

“Critical security systems depend on reliable power and connectivity to perform when they're needed most,” said Ronnie Pennington, Director of Sales for the Americas. “At ISC East, we're showcasing solutions that help integrators simplify installations, prevent disruptions and build more resilient security systems.”

Featured products include:

NEW eFlow™ Pro Series Universal Power Supply Charger offers auto-ranging input, selectable 12VDC or 24VDC output, true battery load testing, and SLA or lithium battery charging. LINQ™ network management interface enables remote power monitoring, control and reporting of diagnostics.

NEW ReServ24B Automatic Transfer Switch with Rapid Battery Charging provides redundant 24VDC power by automatically switching between primary and secondary power sources to prevent interruptions. Built-in rapid battery charging and LINQ™ network management interface maximizes system uptime.

Trove™ Access and Power Integration Solutions easily combine Altronix power distribution with access controllers from more than 50 leading manufacturers. Pre-wired and pre-configured kits simplify installation, wiring and maintenance, while reducing time and labor.

NetWay™ Spectrum Hardened PoE Solutions deliver up to 90W per port with dual fiber connectivity for extended distances in remote, industrial and outdoor environments. With 277VAC input options and compatibility with the Altronix EBC48 Rapid Battery Charger, these solutions provide greater deployment flexibility and faster battery recovery. The new **LINQ4RM** Network I/O Relay Module adds remote monitoring and control capabilities for systems accessories such as enclosure tamper switches, fans, lighting, and more.

Pace™ Long-Range Ethernet Solutions extend connectivity up to 500 meters over structured cabling or 1,000 meters over single-pair Ethernet without repeaters. By eliminating the need to rip and replace existing cabling, it reduces installation costs and simplifies network expansion.

Circ™ Automatic Transfer Switch provides high-voltage power redundancy by automatically switching between two independent 115VAC/230VAC AC power sources. Seamless transfer helps maintain operations when primary power is interrupted, ensuring security systems are operating 24/7.

LINQ™ Network Power Management with Milestone XProtect integrates Altronix power and device intelligence into the XProtect Smart Client. Centralized monitoring of connectivity, voltage thresholds, service alerts and battery conditions simplifies system management and troubleshooting.

Altronix will also feature its new **A/E partner portal**, providing architects and engineers with convenient access to generate CSI specifications, project management resources and other valuable system design tools.

Visit Altronix at **ISC East booth 809** to explore their data and power solutions. For more information, contact Altronix at info@Altronix.com.

About Altronix

A global leader in power and data transmission solutions for professional Security, Surveillance, Access Control, Automation, and Fire Signaling applications, Altronix designs and manufactures innovative low-voltage electronics that provide the foundation for any physical security system. Our comprehensive line of power products and peripherals with network management feature the quality, reliability, and performance that have been associated with Altronix for over 43 years – backed by a Lifetime Warranty.
