Altronix Introduces New Automatic DC Transfer Switch with Built-In Rapid Battery Charging

*ReServ24B delivers seamless power redundancy
for security and access control systems*

Brooklyn, NY (October 6, 2026) – [Altronix](#), the recognized leader in power and data transmission products for the professional security industry, has launched [ReServ24B](#), an innovative automatic 24VDC transfer switch with built-in rapid battery charging designed to provide uninterrupted power and maximize system backup for critical security applications.

"Power disruptions shouldn't compromise a facility's safety or stop daily operations," said Ronnie Pennington, Director of Sales for the Americas, Altronix.

"The ReServ24B gives integrators an easy-to-deploy solution while providing facility managers and end users peace of mind that their access control and security systems will remain online and recover quickly."

This new solution supports applications where constant power is unavailable due to power switching, or when extended battery charging is required. It ensures continuous operations during a power loss by supporting two 24VDC power supplies, instantaneously transferring from the first to the secondary power input to avoid interruptions.

When primary power is restored, ReServ24B automatically switches connected devices back to the primary power source while using excess available power to rapidly recharge SLA or LiFePO4 backup batteries, extending backup. This intelligent power management solution ensures 24/7 operation.

It can be easily integrated into new or existing security or access control systems to optimize battery backup and improve overall system resilience. ReServ24B also includes an Altronix LINQ™ Network Management Interface, enabling remote monitoring, control and reporting via Altronix [LINQ2](#) network communication module.

For more information on the [ReServ24B](#) and other new Altronix products please contact Altronix at info@altronix.com

About Altronix

A global leader in power and data transmission solutions for professional Security, Surveillance, Access Control, Automation, and Fire Signaling applications, Altronix designs and manufactures innovative low-voltage electronics that provide the foundation for any physical security system. Our comprehensive line of power products and peripherals with network management feature the quality, reliability, and performance that have been associated with Altronix for over 43 years – backed by a Lifetime Warranty.
