Altronix Simplifies Security with Smarter Infrastructure Solutions at GSX 2026

Featuring New Products that Maximize Uptime and Extend Connectivity

Atlanta, GA (September 14, 2026) – [Altronix](#), the recognized leader in power and data transmission products for the professional security industry, is highlighting its innovative power and data solutions at [GSX 2026 in booth 2833](#). The company is showcasing power, networking and infrastructure technologies that enhance security systems and streamline deployments.

Altronix solutions on display at GSX 2026 include:

NEW eFlow™ Pro Series Universal Power Supply Charger supports a wide range of security and access control applications with 90VAC–256VAC auto-ranging input and selectable 12VDC at 14A or 24VDC at 10A output. Along with SLA or lithium

battery charging, eFlow Pro features fire alarm disconnect, short circuit and overload protection, low power cut-off, and a LINQ™ network management interface for remote power monitoring, control and reporting of system diagnostics.

NEW ReServ24B Automatic Transfer Switch with Rapid Battery Charging provides redundant low-voltage power with built-in rapid charging for SLA or LiFePO4 backup batteries. Supporting two 24VDC power supplies, ReServ24B automatically transfers to a secondary power source when needed and recharges batteries when primary power is restored. An integrated LINQ™ Network Management Interface enables remote monitoring, control and reporting.

Trove™ Access and Power Integration Solutions combine Altronix power distribution with access controllers from more than 50 leading manufacturers in flexible wall- and rackmount configurations. Pre-wired and pre-configured kits reduce installation time and simplify wiring, service and maintenance, further streamlining deployment.

NetWay™ Spectrum Hardened PoE Solutions deliver power and data to devices in remote, industrial and outdoor locations with up to 90W per port and fiber connectivity for extended distances. 277VAC input options expand deployment flexibility, while compatibility with the **Altronix EBC48 Rapid Battery Charger** accelerates battery recovery and maximizes system uptime. A new network I/O relay module (**LINQ4RM**) enables remote monitoring and control of essential system devices and accessories from virtually anywhere.

Pace™ Long-Range Ethernet Solutions make it possible to deploy IP devices over new or existing cabling at distances far beyond conventional Ethernet limits. Pace extends range up to 500m over structured cable or 1000 meters over single-pair Ethernet (SPE) without repeaters. Pace offers a practical way to expand security and building automation networks, also supporting T1L industrial devices, without having to rip and replace cabling – saving time and labor.

Circ™ Automatic Transfer Switch adds high-voltage power redundancy for critical systems by automatically switching between two independent 115VAC or 230VAC power sources. Seamless transfer helps keep connected equipment operating when the primary source is interrupted.

LINQ™ Network Power Management integrated with Milestone XProtect brings Altronix power and device intelligence directly into the XProtect Smart Client. Users can centrally view connectivity, voltage thresholds, service alerts and battery conditions, providing faster insight into system health and potential issues.

Attendees can explore these Altronix solutions at **[GSX 2026 booth 2833](#)**.

Altronix is also announcing the release of a new A/E partner portal for direct access to generate CSI specs, manage projects, and utilize helpful tools.

About Altronix

A global leader in power and data transmission solutions for professional Security, Surveillance, Access Control, and Fire Signaling applications, Altronix designs and manufactures innovative low-voltage electronics that provide the foundation for any physical security system. Our comprehensive line of power products and peripherals with network management feature the quality, reliability, and performance that have been associated with Altronix for over 40 years – backed by a Lifetime Warranty.
