**New Altronix Voltage Regulator,  
Saves Space Making Installs More Efficient**

*VR10 Converts 24VDC to 12VDC, for Dual Voltage Applications*

**Brooklyn, NY** (July 13, 2023) – [Altronix](https://www.altronix.com), the recognized leader in power and data transmission products for the professional security industry, introduces the newest addition to its product lineup, the VR10 Voltage Regulator. Designed to optimize power in access control installations, the VR10 converts a 24VDC input into a regulated 5VDC or 12VDC output, saving valuable enclosure space and significantly reducing installation and maintenance expenses.

“As security and access control systems continue to evolve, the demand for reliable and efficient power solutions has become increasingly critical,” said Ronnie Pennington, Director of Sales for the Americas, Altronix. “The VR10 empowers security integrators with a versatile, yet compact, and stackable power converter that optimizes system performance, while reducing costs.”

The Altronix VR10 offers a range of features designed to ensure seamless integration and consistent performance in diverse installation environments. Key features and benefits of the VR10 include:

- **Space-Saving Design:** The VR10's unique stackable design allows for seamless integration, minimizing the system's overall footprint, while streamlining installation. It's compact form factor, provides an ideal solution for projects with limited space.
- **Cost-Effective Solution:** By eliminating the need for an extra power supply, the VR10 significantly reduces material and labor costs associated with system installations, upgrades, or expansion. This innovative approach translates into substantial savings for security integrators and end-users.
- **Reliable Power Conversion:** The VR10 delivers a stable 12VDC output at 10 amps, ensuring consistent and reliable power distribution to connected devices. This reliability is crucial for maintaining the uninterrupted operation of security and access control systems.
- **Device Compatibility:** The VR10 Voltage Regulator is designed to seamlessly integrate with a wide range of access control sub-assemblies, making it a versatile choice for both new installations and retrofit projects.

#### **About Altronix**

Altronix Corporation is the leading designer and manufacturer of quality low voltage electronics for the video surveillance, security, fire, access control and automation markets that deliver "More than just power". Altronix corporate headquarters is located in Brooklyn, NY, U.S.A. occupying approximately 200,000 square feet with the latest manufacturing technologies providing the highest levels of quality and reliability. Altronix is an ISO 9001 registered firm. Altronix products are NDAA and TAA compliant and carry a lifetime warranty.
