**Altronix Trove™ Solutions Now Accommodate
LenelS2 NetBox Large Scale Access Systems**

New Trove LenelS2 Integration Provides Power and Control for up to 28 Doors

Altronix / LenelS2 NetBox Configuration
(boards sold separately)

Brooklyn, NY (September 10, 2020) – [Altronix](https://www.altronix.com), the recognized leader in power and data transmission products for professional security applications, continues to expand the company's popular Trove™ Access and Power Integration Solutions. Altronix now seamlessly integrates its power and sub-assemblies with the LenelS2 NetBox platform for installations supporting up to 28 doors in a single housing.

“Trove solves system design and installation challenges with a greater degree of versatility and cost-effectiveness,” said Ronnie Pennington, Director of Sales for the Americas, Altronix Corporation. “We are pleased to announce that Trove now supports even larger LenelS2 access systems.”

Altronix new Trove3SS3 is completely customizable and accommodates LenelS2 controllers with Altronix power distribution. Pre-configured kits with Altronix power and sub-assemblies are available to support systems with up to 28 doors, reducing valuable time and labor costs. These new products join Altronix Trove2 solutions for LenelS2 systems with up to 14 doors, providing more options for system designers.

All Trove power and access integration solutions simplify board layout and wire management, while providing maximum flexibility and scalability in the design and deployment of the industry’s leading access control brands. Trove enables installers to easily configure and pretest systems prior to on-site installation and provides a single point of service and maintenance.

Altronix free Trove system design tool is available at:
