Altronix Showcases Expanded Portfolio of Power and Data Transmission Solutions at ISC East 2024

Products deliver higher levels of integration, scalability, and uninterrupted performance

New York, NY (November 20, 2024) – [Altronix](https://www.altronix.com), the recognized leader in power and data transmission for the professional security industry, is showcasing its expanded lineup of industry-proven technologies at ISC East 2024 in [booth 713](#). The expanded product portfolio further addresses the evolving needs of security professionals, offering robust solutions for access control, video surveillance, fire, and network management , designed to streamline deployment and better protect critical infrastructure.

“Our latest new power and data transmission solutions further improve system performance and efficiency while simplifying installation, helping security professionals stay ahead of the technology curve in our rapidly evolving industry,” said Alan Forman, President of Altronix. “From extending Ethernet reach to providing reliable power in critical situations, our Altronix solutions help sustain continuous system operation with greater efficiency.”

Highlighted solutions include:

Reliable Power Management:

- **Circ1ATS:** With two independent 115VAC or 230VAC inputs, this Automatic AC transfer switch is designed to ensure seamless power transitions for critical security infrastructure, minimizing downtime during power shifts.
- **CommBatt:** UL2524 BDA Power and Backup system designed for emergency response radio systems ensures ongoing communication to first responders, during outages or system disruptions.

Enhanced Connectivity and Remote Monitoring:

- **LINQ™ Network Power Management:** Offers remote monitoring, control, and reporting of power diagnostics, helping optimize performance and quickly address issues, enhancing overall system reliability.
- **TempoA4:** 4-zone activity monitoring/occupancy alert system provides situational awareness by reducing risk.

Extended Ethernet Solutions:

- **Pace:** Extending Ethernet beyond traditional limits, Pace enables connectivity over existing two-wire up to 1000m or structured cabling up to 500m without repeaters, supporting IP and T1L industrial devices over longer distances.

- **NetWay Spectrum with EBC48:** Hardened Outdoor PoE Switch with Integrated rapid battery charger (EBC48) supports extended backup times to deploy IP devices in remote locations utilizing fiber optic cabling.

Integrated Access Control Systems:

- **Trove™ Series:** Featuring new integrations with LiftMaster, Axis, and other leading brands, these pre-wired, pre-configured solutions simplify installation, offering versatile mounting options to suit varied project requirements in new extended rack mount and scalable wall mount configurations.

Explore Altronix's latest power and data transmission solutions firsthand at ISC East 2024 in [booth 713](#) with demonstrations showcasing how they enhance efficiency, scalability, and operational control. Our team of power and data transmission experts will be on hand to discuss how to leverage Altronix solutions to meet specific project needs.

About Altronix

Altronix Corporation is the leading designer and manufacturer of quality low voltage electronics for video surveillance, security, fire, access control and automation applications that deliver "More than just power". Altronix corporate headquarters is located in Brooklyn, NY, U.S.A. occupying approximately 200,000 square feet with the latest manufacturing technologies providing the highest levels of quality and reliability. Altronix is an ISO 9001 registered firm. Altronix products are NDAA and TAA compliant and carry a lifetime warranty.
