**Altronix Showcases New Technology and Product Enhancements  
at ISC West 2025**

**Las Vegas, NV (April 2, 2025)** – [Altronix](https://www.altronix.com), the recognized leader in power and data transmission products for the professional security industry is displaying the company's latest innovations here at ISC West in [booth #11073](#). Features include integrated power and access control solutions that streamline installation and reduce labor costs, and the latest solutions to deploy IP devices utilizing coax, fiber or Ethernet infrastructure.

"Altronix continues to deliver new and innovative ways to streamline the deployment of advanced IP devices with greater cost-efficiency, versatility and reliability to ensure heightened security and safety," said Alan Forman, President of Altronix. "We look forward to demonstrating the numerous advantages and benefits our latest product line-up delivers to our installation partners and customers at ISC West 2025."

New Altronix products on display in booth 11073 include:

- **Netway Spectrum with EBC48 Integration** – The Altronix EBC48 recharges 32AH batteries for NetWay Spectrum models in under eight hours to ensure critical security devices remain operating when there is only intermittent power at the pole. New 277VAC input options now available!
- **Pace™** – Advanced technology that extends Ethernet connectivity well beyond traditional limitations, supporting distances up to 1000 meters over a single pair or up to 500 meters over structured cabling, providing an ideal solution for challenging long-distance industrial and IP video applications.
- **Circ™** – Advanced multi-path/redundant power solutions ensure seamless transitions between two independent 115VAC or 230VAC inputs, eliminating downtime during power interruptions and power failures, to maintain mission-critical security operations.
- **Trove™ Series** – Comprehensive pre-wired, pre-configured access and power kits supporting over 50 leading access control brands including AMAG, AXIS, Azure, Brivo, Hirsch, Mercury, Software House, and TDSi. Easily combine Altronix power with access controllers in scalable wall-mount to extended rack-mount configurations for any installation environment, providing a single point for service and maintenance, minimizing wall space.
- **TEMPO724Q** – New two-channel network programmable 24/7 timer is designed for diverse applications from security, access control, home automation to lighting control and more. Featuring dual form “C” relay contacts, advanced LINQ™ technology for remote programming and diagnostics, and precise scheduling capabilities, it ensures reliable, synchronized control across complex systems.

- **LINQ™ Network Power Management** – Sophisticated remote monitoring platform enabling real-time control and comprehensive reporting of power diagnostics, optimizing system performance, preventative maintenance, and overall operational uptime.

Altronix Trove™ integration solutions will be prominently featured across multiple strategic partner locations throughout the event:

- **Honeywell (LenelS2):** Experience Altronix Trove integrated access and power solutions within the comprehensive LenelS2 ecosystem at booth #18059.
- **Inner Range:** Discover how Altronix Trove enhances Inner Range's security management systems at booth #25099.
- **Hirsch:** Explore access control featuring Altronix Trove access power in wall and rack solutions at booth #13089.
- **PDK:** See Altronix's power supply units working with PDK's access control technology at booth #13099.
