Altronix and Inner Range Team-up to Offer New Access & Power Integration Solutions *Trove™ Solution Streamlines System Design with Integriti Controllers*

Brooklyn, NY (June 01, 2023) – [Altronix](#), the recognized leader in power and data transmission products for the professional security industry, is proud to announce the integration of their Trove™ access and power solutions with the Inner Range Integriti line of access control. Available with or without pre-configured power distribution, the Altronix Trove™ Series allows systems integrators to easily combine Altronix power with Inner Range Integriti controllers and accessories.

“Combining Altronix power with Integriti access streamlines system design and install, resulting in cost and time savings for systems integrators,” said Ronnie Pennington, Director of Sales for the Americas at Altronix. “We are pleased to add Inner Range as a trusted partner so our customers can continue to have more options when it comes to their access and security systems.”

Altronix accommodates Inner Range Integrity in the Trove2 and Trove3 Series, supporting up to 16 doors with power in a single enclosure. T2IRK78S pre-configured kit includes access power and control for up to 8-doors and T3IRK7716S pre-configured kit supports up to 16-doors from a single enclosure, making it easy to add any Integrity controller or module that is required in your system. Removeable backplanes further allow for configuration and testing prior to on-site installation, simplifying board layout and wire management, increasing ROI.

"We are excited to partner with Altronix and integrate our Integrity line of access control with their Trove™ access and power solutions," said Bob Dolan, North American Technical Director for Inner Range. "This partnership provides our customers with more flexibility and options in designing and installing their security systems, ultimately resulting in more efficient and cost-effective solutions."
