**Altronix Showcases World-Class Power and Data Solutions  
at Intersec 2024**

**Dubai, UAE** (January 16, 2024) – [Altronix](#), the recognized leader in power and data transmission for the professional security industry, is showcasing its latest best-in-class solutions here at Intersec 2024 at the Dubai World Trade Centre Stand S1-B41. Altronix products are critical for networked access control, surveillance and fire systems, providing extreme versatility and cost-efficiency over any infrastructure.

“We look forward to sharing Altronix’s latest technologies and solutions with decision makers in the EMEA region, and meeting with our integration and distribution partners who assist in supporting them,” said Alan Forman, President, Altronix Corporation.

Altronix will be showcasing the following at Intersec 2024:

**Trove™ Access and Power Integration Solutions** now include high-capacity wall mount kits that accommodate up to 36 doors, and rackmount versions that support 8 doors with integral power. New Trove accessories further simplify system design and installation. Pre-configured and pre-wired kits supporting the industry’s leading access brands are available in a wide range of designs and capacities to accommodate any application.

Altronix **NetWay™ Spectrum PoE and Fiber Solutions** support the latest 802.3bt cameras, illuminators, wireless access points and other devices deployed at remote locations with or without local power. New NetWay Spectrum models boasting up to 360W of power are also now available. Designed for a wide range of indoor and outdoor professional security applications, hardened NetWay Spectrum PoE switches and media converters accommodate fiber, hybrid, and structured cable. Embedded Altronix **LINQ™ Network Power Management** technology enables advanced remote capabilities to control devices, monitor and report system power diagnostics from a single-pane platform, greatly increasing system reliability and ROI to enhance any security installation.

The new Altronix **NetWay5P 5-Port Hardened PoE+ Switch** provides power for up to four IP devices utilizing a single Ethernet cable to streamline installation and power for any combination of IP access control and surveillance devices. The compact solution is ideal for any indoor or outdoor application and can be powered from wherever 24VDC is available. The **NetWay5PQ** offers the same space-saving features along with embedded LINQ Network Power Management technology.

Additionally, a new version of the popular **PT724A Annual Event Timer**, the **Tempo724Q Network Programmable Timer** provides remote programming over the network. The Tempo724Q allows installers to remotely service, program and schedule events without the need to roll a truck.

Ideal for citywide surveillance, elevator communications, HVAC applications, and more, **Pace™ Long Range Ethernet Adapters** transmit power and data up to 500m over structured cable or 1000m over a single pair for deploying IP devices at longer distances.

In keeping up with the latest industry technology trends and demand for new solutions to longstanding challenges, Altronix continues to develop innovative products that increase efficiencies and reduce overall costs. One such example is the **DN200 DIN**

**Rail Mount Power Supply** providing up to 200W with a built-in battery charger, further streamlining installations to conserve valuable space. DIN Rail mounting accessories are also available for Altronix Trove access and power integration solutions.
